DESIGN ADDICT

Patient Name: TilottamaSantosh Jadhav

Age/Sex: 35 / Female

Referring Doctor: Dr. KasturiKurahde

Date: 23-06-2025

Clinical Indication:

Abnormal uterine bleeding / Menstrualirregularities

FINDINGS:

Uterus: The uterus is anteverted and normal in size. The endometrial lining appears slightly thickened, measuring approximately 10.5 mm. A well-defined echogenic soft tissue lesion is seen within the endometrial cavity, measuring approximately 1.8 x 1.2 cm, suggestive of an endometrial (uterine) polyp. No significant vascularity noted on Doppler. Myometrium is homogeneous. No fibroids observed.

Ovaries: Right ovary measures 3.0 x 2.1 cm; Left ovary measures 2.8 x 2.3 cm. Multiple small follicles noted bilaterally. No dominant follicle or cyst seen.

AdnexaandCul-de-sac:Noadnexalmassesorfreefluidseen.

Urinary Bladder: Appears normal.

IMPRESSION:

Endometrial(uterine)polypidentified.

Clinical correlation advised.

Hysteroscopic evaluation may be considered for confirmation and further management.
